Some people think that typing is not an important skill now. In the era of Google Now, Cortana and Siri, people are already moving from text-based search to voice search. However, there are many such streams where talking to machines is not enough. That's when the best typing software can help. The skill of touch typing has increased over the time for quick and effective content creation. Fortunately, there are a few free typing software for beginners to learn typing fast and work with your system fast and effectively. What is Typing Software? Typing software is a computer program that helps you in learning typing through interactive, and engaging sessions. Popular typing software are the interactive programs, which support virtual keyboard & number pad for an easy typing experience. The best typing software depends on its AIbased unique algorithms for assessing the typing software for Mac & Windows are ideal for improving typing software for PC that would help in learning typing efficiently and quickly. Free Typing Software for Windows Rapid Typing tutor is also one such tool that would help with making the entire keyboard training process totally worth it. Even kids can learn typing faster by playing a typing game with Rapid Typing Tutor. The typing software for kids and adults alike gives you easy lessons so that you can learn keyboard skills efficiently. Pricing: Typing lessons are available for free. Pros: Rapid Typing Tutor has a virtual keyboard with zone highlights that helps in learning the placing of your fingers on a keyboard with zone highlights that helps in learning the placing of your fingers on a keyboard with zone highlights that helps in learning the placing of your fingers on a keyboard with zone highlights that helps in learning the placing of your fingers on a keyboard. The software for Windows simplifies typing lessons for you by displaying your hands while they are moving on the keyboard. These hands guide you about which finger to use if you want to press the current key. Even students can use this free typing app for PC to become proficient at typing. What's more, the typing tutor software uses minimal system resources so that you don't face any hiccups while running this application. Cons: It may take you a while to adjust to different keyboard layouts besides the typing Software for Windows, Mac, Linux An interactive program to help users to improve their current typing skills. KeyBlaze is a great free typing tutor. The software is great for those who are looking to increase their per-minute typing speed such as secretaries, data entry operators, marketers, writers, etc. Pricing: KeyBlaze is a best typing software for PC and works best with Mac as well as Windows operating systems for free. Pros: With its 10-key number pad and touchtyping facilities, the software operates on Windows and is apt for people with varied skill levels. The software offers dictation audio exercises to practice transcription, fun typing games, etc. Additionally, the free typing tool enables you to take practice exercises that help in testing users' typing skills with exercises like poems, drills, prose, etc. Con: The software has an easy user interface apt for adults. However, kids looking to improve their touch-typing skills may find the software less attractive. KeyBlaze Free Typing Tutor Compatibility: This free online typing tutor has 17 classic lessons. These lessons allow you to learn all the letters on the keyboard before your skills get tested through reviews. Pricing: Speed Typing Online is a free online typing tutor software. Pros: The software offers two lessons formats (classic lessons and advanced lessons) so that you can choose how you'd want to learn. Additionally, with Speed Typing Online software, you can customize the length of all lessons. You can also set your typing goals using this software is apt for beginners but not very helpful for advanced users. Not only this, users need to register to access or save available lessons. Speed Typing Online is a free typing online typing only your index fingers. Use this online typing tutor to learn touch typing with the help of Bolt AI. Are you wondering what Bolt is? It is an Artificial Intelligent engine which studies typing software, which has a user-customizable UI so that you can quickly type without looking at your keyboard. This smart UI also reflects on which finger the user should use to type each letter. Pricing: Typing Bolt is a free typing tutor software. Pros: Bolt AI measures your keystroke dynamics. Additionally, it understands your typing pattern. Based on this analysis, Bolt AI generates words that emphasize more on your weakest keys at a given time. Additionally, by analysing your typing skills, Bolt AI automatically controls difficulty levels. Simply view a graphical representation of your performance that helps you understand your current skill level and the areas you are required to work on for better results. Cons: The only hitch is that Bolted connection has slightly lesser strength in axial tension. This is because the net area at the root of the thread is less. Typing Bolt Compatibility: Typing Bolt is a free online typing.com is a best free typing software for PC, which helps improve progress of a work on a regular basis. Multiple level typing tests at one, two and five minutes respectively help in gauging the performance levels so that you can improve your typing. Pricing: It's free typing software for laptop is suitable for students & teachers. Pros: Its engaging curriculum teaches the fundamentals and basics of technology to students Students Students learn faster with fun typing games and interactive lessons. This gamified learning is a must to ensure accurate and fast typing. Another significant advantage is that Typing.com offers lessons as well as instructions in English/Spanish language Con: Only a limited number of lessons are available on Typing.com. This implies that advanced users may not find the lessons very helpful. Typing.com is a free typing com is a free typing com. Both schools and individuals can use it for free. However, a paid school edition version is also available. Teachers can use free typing lessons offered to monitor the progress of students and customize lessons. Also, this tool used by teachers for customizing lessons, monitoring students and managing several classes all at once. Pricing: You can learn touch typing app for PC. You can also opt for the premium TypingClub school edition for advanced features. Pros: Mobile typing app for PC. You can also opt for the premium TypingClub school edition for advanced features. correct hand posture on keys as you type. You are rewarded with stars and badges as you go up the ladder. It offers Multiple levels for building muscle memory and motivation Con: Typing Club's free version includes ads. Also, it has the same lessons for all ages and grade levels.
